  (Private Sector v.s Development Sector
  Private Sector v.s Public Sector
  Public Sector v.s Development Sector)

Agriculture Statistics System

The team comprises of experts in Information Technology (IT) with long experiences in data fetching and analysis as well as producing real time reports for management decision makings. The work includes needs assessment, database design, data compilation, data warehouse, online interface for data entry and management, report enquiry and automatic report production. Data can be presented in tabular, graphical and infographic forms.

Strategic Operations on Programme and Project Management and Budgeting

Having seen various programmes and projects being implemented simultaneously by donors, international not for profit organisations, non-profit associations and the Ministry of Agriculture, Forestry and Rural Development. However, the programmes and projects seem to be implemented in different directions and much follow the individual organizational result's framework. The strategy operations on programmes and project management can link all existing and future projects together to ensure relevance to the overall government's development direction. This if managed well can lead to cost and performance effectiveness and maximizing benefits for communities.

Agriculture Entrepreneurship Project Design and Execution

LGE team is very experienced in producing creative conceptual design, agribusiness proposal, and entrepreneurship grant management. The agricultural entrepreneurship programme can be designed and executed as a turn-key project as we have our conceptual design team, training team and monitoring team who can follow up with participants from start to the mature stage of their business operations. Our marketing team can provide market linkage, product design and marketing strategy for small products as most of the agriculture projects and agribusiness interventions currently lack the linkage between producers and buyers. The most important is to ensure there is market by proving insights into current market and products and whether there is a demand for such a product to begin with.

LGE ກັບຈຸດພົ້ນເດັ່ນ ແລະ ທ່າແຮງ

LGE ກັບຈຸດພົ້ນເດັ່ນ ແລະ ທ່າແຮງ
